Office Action Summary	Application No. 10/568,446	Applicant(s) MYHRBERG ET AL.	
	Examiner DAVID L. SORKIN	Art Unit 1797	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim is rendered indefinite by the terms "such as" and "etc".

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1 rejected under 35 U.S.C. 103(a) as being unpatentable over Bosch et al. (US 6,241,472) in view of Rains et al. (US 4,209,259). Regarding claims 1 and 7, Bosch ('472) discloses a device comprising an inner stationary ring (the inner most ring of 40) and a concentric outer ring (one of the rings of 38), the rings arranged with a close fit and having a plurality of through recesses opposing each other (see Fig. 3). It is not explicitly disclosed that the device is driven without a shaft. Rains explains that it is beneficial to drive a rotor in a vessel magnetically, using a drive unit outside the vessel without a shaft, because no seals are required (see col. 5 line 66 to col. 6 line 5). It would have been obvious to one of ordinary skill in the art to have driven the rotor of

Bosch in this manner to achieve the benefit of eliminating the need for seals. Regarding claims 2 and 3, the shearing recesses are otherwise shaped holes (see Fig. 3).

Regarding claims 4-6, the structure of the rings is shown in Fig. 3.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
